**Directions:** Cut out the definitions below and paste them next to the correct vocabulary word.

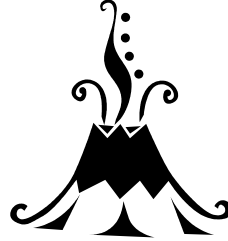

A funnel-shaped pit near the top of the central vent of a volcano

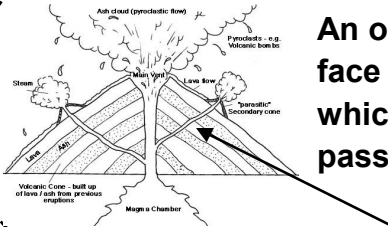

A crater that forms when the ground sinks around the vent

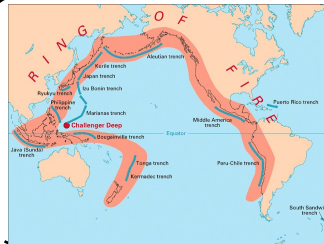

area of deep cracks that forms between two tectonic plates that are pulling away from each other

A vent or fissure in the Earth's surface through which magma and gases are expelled

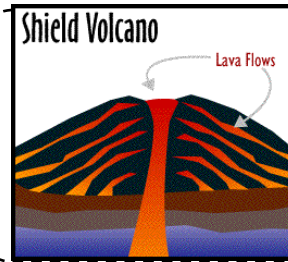

An opening at the surface of the Earth through which volcanic material passes

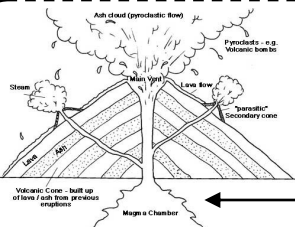

An area of volcanic activity that borders the Pacific Plate

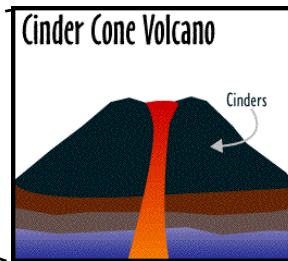

Liquid magma that flows from a volcanic vent

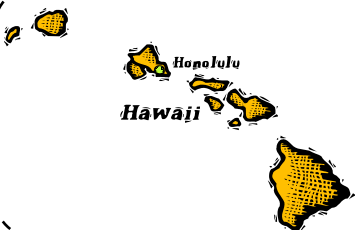

Built by layers of lava, non explosive eruptions, gentle sloping sides, ex. Mauna Kea

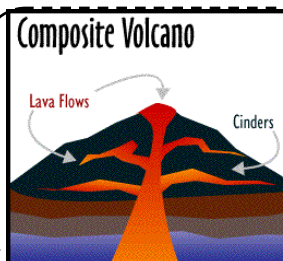

The body of molten rock that feeds a volcano

Pyroclastic material, steep slopes, moderately explosive

A volcanically active area of Earth's surface far from a tectonic plate boundary

Explosive eruptions, and quiet flows, layers of lava and pyroclastic material, wide base, steep slopes. Ex. Mt. Fuji
